

Strategic Guidelines Be Group Growth & Targets 2017

*Investor Presentation at Park Hyatt Hotel
Milan, September 30th 2014*

AGENDA

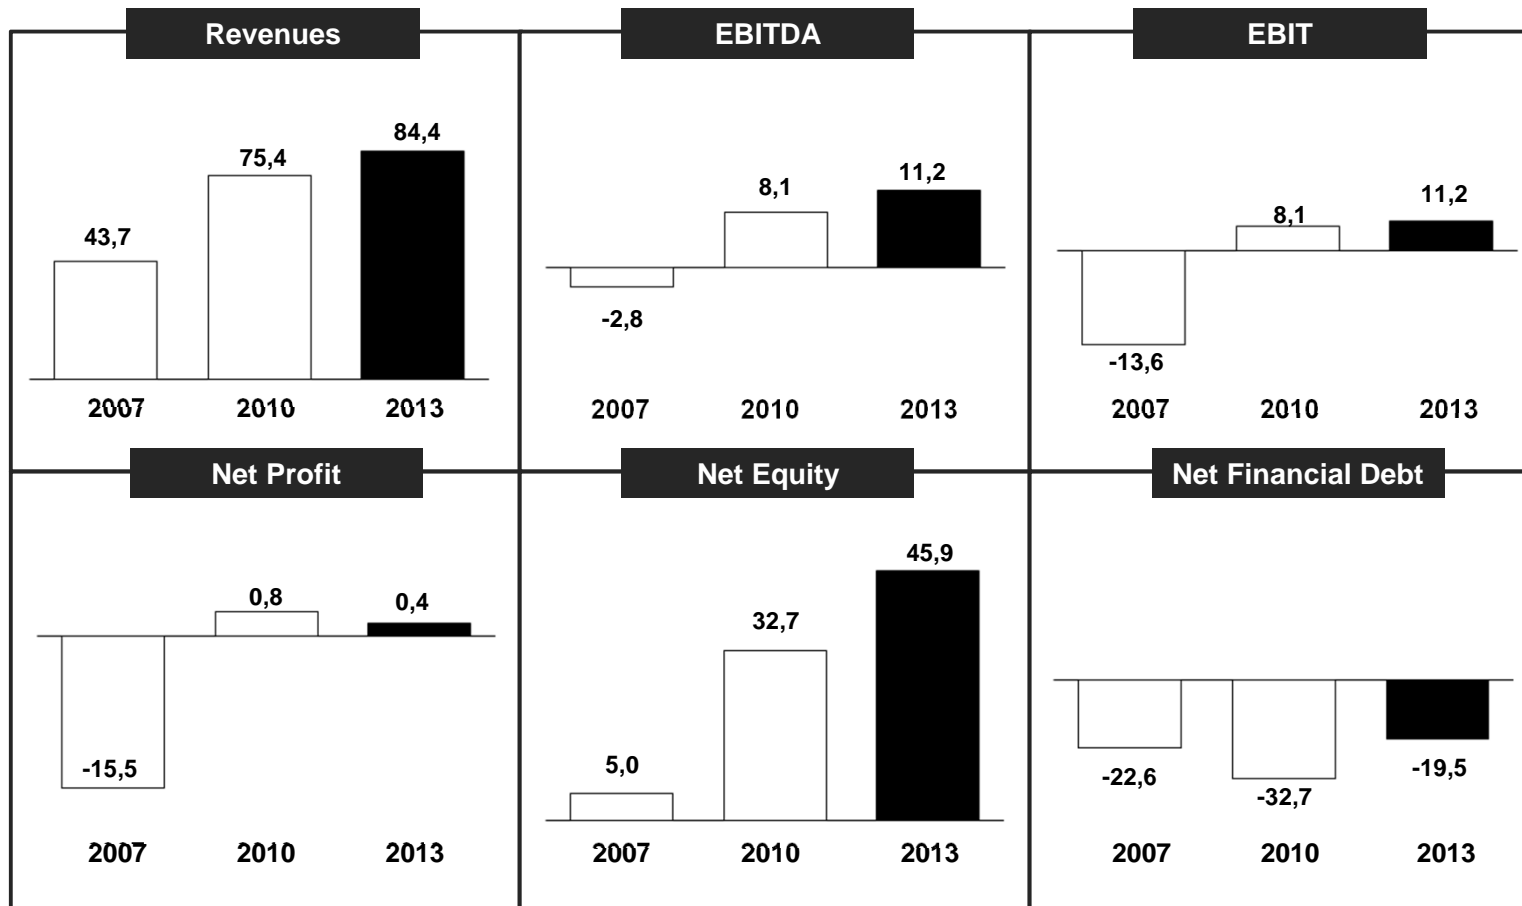

- **The first part of our journey (2007-2014)**
- Guidelines & Targets for 2015-2017

Appendix

The first part of our journey (2007-2014)

Key Financials

Figures as at 31.12 for each year

The first part of our journey (2007-2014)

How we have transformed the Group

Revenues
(Growth, Segment, % and cashflows)

	2007	2010	2013
• Rev/in	-	+ 51,3	+ 23,1
• Rev/out	-	- 19,6	- 14,1
	-	+31,7	+9,0
• EBITDA	- 2,8	+ 8,1	+ 11,2

- In that period, **about 500 employees have left the Group while we hired over 700 new professionals. Total headcount exceeds 1,000 today.**
- During the last 7 years, we dismissed non core activities for over 30 ml./€ in the BPO area, while were **created new revenues for over 500 ml./€**
- In 2007 Be was only a domestic Italian Group. Today Be is operating across Europe with offices **in 8 different countries** (Italy, UK, Germany, Austria, Switzerland, Poland, Romania and Ukraine) and more than **20% of our revenues are non-domestic.**
- Be has become **one of the three largest suppliers of management consulting services for the two leading italian banks.** We have signed multi-annual contracts with those clients and are now expanding our presence within other large European banks.
- The current Be Group originates from the acquisition of DataService by Tamburi Investment Partners in 2007.
- **During the last 7 years** we have turned a BPO traditional operator into a leading consulting and ICT provider to the Financial Services industry.

The first part of our journey (2007-2014)

The current market position

- **Our firm is best suited to support leading Banking Groups**, who operates internationally with **highly complex projects, cross-country scope and strong specialisation requirements**. At present, Be is currently managing also a number of innovative strategic projects promoted by major industry bodies in Europe.

- In the last year Be has initiated its **strategy to expand on new innovative business segments with high growth potential** (Sports, Media and Entertainment), where we can **leverage on our financial services experience and value propositions**.
- **Be is a «Made in Italy» brand. Italian shareholders own over 63% of the company equity (worth over 45 ml/€)**. They have shown great commitment to value creation and confidence in the company potential. **More than 35% of the equity is floated on the Stock Exchange**.
- In the last three years, Be has invested in total **12 ml./€** for the acquisition of three **companies (2 of them outside of Italy)** and has started-up 4 new ventures in Europe.
- **Be recently entered the STAR segment of Borsa Italiana**. We are the only Italian company to report such a fast progression, despite the persistent economic crisis of the last decades.
- Since June 2013, our share price has increased by **151%.**, exceeding the major reference market indices in the same period.

The first part of our journey (2007-2014)

Structure of our Revenue Portfolio

Forecast at 31.12.2014

AGENDA

- The first part of the journey (2007-2014)
- **Guidelines & Target 2015-2017**

Appendix

- **The spread of digital technology is transforming the business environment**
 - 29 million internet/mobile customers in Italy, more than 80% of the population with internet connection, + 6% growth of e-commerce up to 22.3 billion/€ transactions.
 - e-commerce volume is grown by over 100% in Germany and Poland;
 - Electronic transactions through smartphones and tablets are estimated at 9.7 billion/€ in UK (+63% compared to 2013).

- **The Financial Services industry is one of the first and most impacted sectors**
 - Distribution systems still designed for customers with low propensity to digital access;
 - Only few players have yet successfully integrated different channels (branches, web, apps, phone,...);
 - The use of "Big Data" is starting to generate projects that create real value;
 - The payment industry is the most exposed to the risk of disintermediation (Apple Bank, Payment Institutions, Telecom initiatives,...).

- **Banks will face four major challenges** during the next 36 months:
 - **Customer Centricity** requires financial players to develop the innovation value-chain: analytics, data monetization, big data, mobile and innovative payments, loyalty and marketing.
 - **Regulatory compliance** increasingly forces banks to purchase new range of services from companies with vertical expertise and high specialisation.
 - **Back Office Consolidation / Cost Reduction strategies** require both specialization and deep customer knowledge.

- The **insurance industry** faces similar challenges and is expected to devote most of the effort to: increase **processes efficiency**, invest on **new channels** and **client relationship models**, improve business **performance** and develop **new products**.

Guidelines & Target 2015-2017

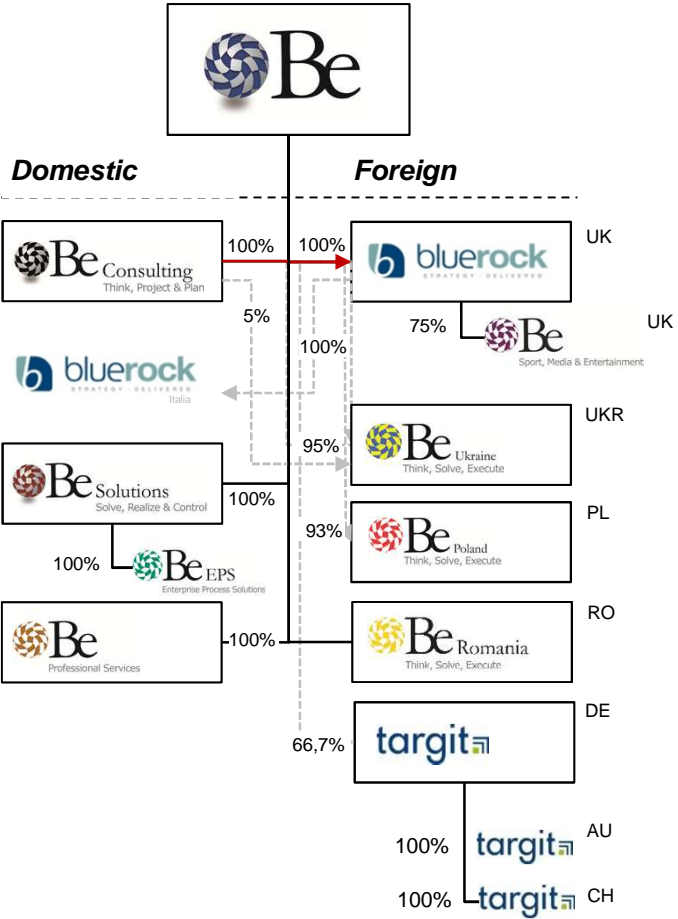

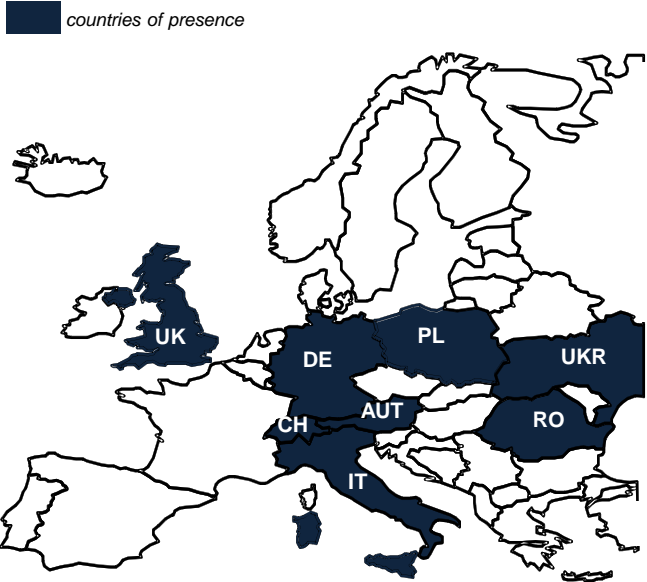

Outlook, Business Consulting & System Integration in EU

- Gartner and Assinform report that markets where Be is operating (UK, DE, IT, AU, CEE, PL, RO, CH) **are growing between 4.2% and 6.6%, from 33 billion/€ in 2014 to over 37 billion/€ in 2017**, if we only consider management consulting and a subset of ICT services.
- **About 27% of the entire market (between 8.9 billion/€ 10.0 billion/€) comes from Banking and Insurance.** In Italy, financial players are expected to have limited spend growth compared to these standards (between 2% and 5% across different segments).
- **Be is one of the top players in Italy in the “ICT Consulting” segment.** The Group includes a range of companies with different and complementary value propositions. Excluding software products and hardware providers and outsourcers, our peers are management consulting and specialized system integration players.
- The size of our Company is smaller compared to the main competitors, but the **focus on the Financial Services industry makes Be a peculiar company in its segment.** The development of our brand is driven by our industry focus and our specialization in assisting the largest financial players in complex cross-border initiatives.
- In this context **the estimates for growth of our brand are higher than market**, since the exploitation of the need of specialized services in this area is still low.
- The ability to "originate" new business, the composition of the service portfolio, the relatively young business model and the opportunity to access a wide range of professional skills at different levels of seniority are our key challenges for growth.

Guidelines & Target 2015-2017

Geographies and organization

Guidelines & Target 2015-2017

The objectives of the Plan(1/2)

- 1** **Increase the share of non-Italian revenues from current 20% to 35% by 2017.** The growth of the UK, German, Polish and Austrian markets is estimated to be greater than the domestic one. The expectation is based on the increasing sales volume from Targit GmbH (Germany, Austria and Switzerland), the strong growth of our “digital hub” (operating in UK, Italy and Germany) and on the development of the new venture we recently launched in the Sports, Media and Entertainment segment. Total expected growth is significant but achievable if we consider that these companies have currently limited market share in their competitive environments.
- 2** **Strongly increase the revenue volume for Consulting services.** We expect to consolidate on the domestic market and to increasingly gain access to medium-large size projects of international scale. At the same time, we plan to expand our service portfolio through access to new competencies and skills.
- 3** **Recover margin in ICT services** (from 13% to the 18%). We expect the existing ICT business lines – Enterprise Data Governance, Insurance, Utilities – to develop steadily. This will be driven by a growth of our current workforce, thanks to hiring of new highly specialized resources and reduction of the use of external contractors.
- 4** **Invest on the “Be” brand.** We are significantly revising the current exposure of Be on the Internet and the main professional social networks. We plan to invest on the continuous improvement of our performances by launching of "quality review" and "customer satisfaction" initiatives. We also envisage to increasingly invest on internal training to consolidate our intellectual capital and professional development paths.

Guidelines & Target 2015-2017

The objectives of the Plan(2/2)

- 5** **Engage more than 1,500 "professionals" in 2017.** We plan to fuel the growth of our business with high qualified and cutting-edge competencies in ICT, as well as with recognized experts and professionals in business consulting.
- 6** **Reduce our Net Financial Position from 24.7 ml / € as of 30.06.2014 to about 13 ml / € at the end of 2017.** Our cash flow projections are based on the expected EBITDA growth while taking into account our debt re-payment obligations and the investment required to streamline operations.
- 7** **Distribute dividends.** Given the expected results, we believe that during the 2015-2017 timeframe dividend distribution will be consistent with the strenghtening of the Group's financial position.

Lines of development and target 2015-2017

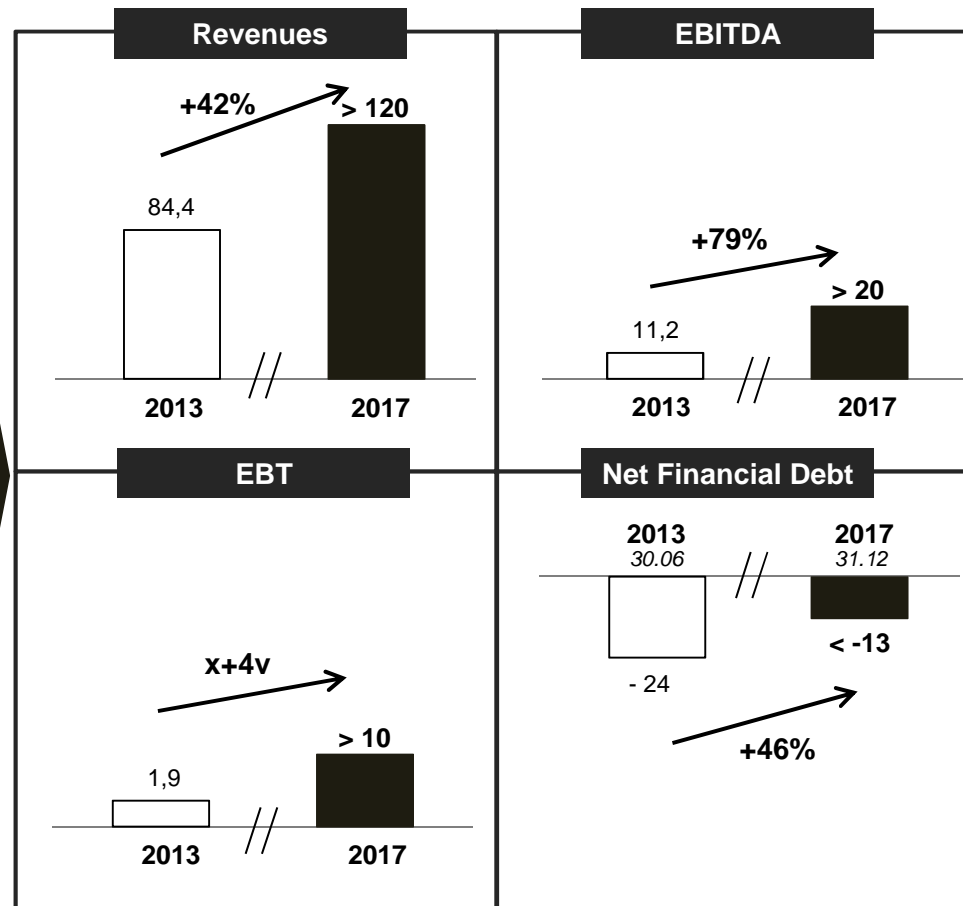

Plan targets 2017

Key Assumptions

- The 2015-2017 Plan is based on the current business perimeter.
- Although these may have a limited and indirect impact on the company results, the plan also takes into account a number of macroeconomic variables for the geographies in scope:
- Limited GDP growth in 'the "Eurozone" (1.5% on average).
- 3-month Euribor expected to remain stable for 2015 with a recovery of +0.20% in 2016 and +0.50% at the end of 2017
- We do not expect substantial changes in foreign exchange rates in the medium term. The plan utilises four different exchange rates: 1GBP=1,25€, 4,13PLN=1€, 17,5UAH=1€, 4,4RON=1,€.
- Possible fluctuation in the value of UAH (Ukraine) and RON (Romania) are expected to be mitigated by client agreements that link revenue volumes to USD.
